

The Westchester County  
Department of Emergency Services

# TRAINING ANNOUNCEMENT

Issued: February 1, 2018

Announcement #: 18-28E

## Fundamentals of Trauma (BLS Core)

It is vitally important that we provide care to our patients within the "Golden hour". Some trauma scenes can be chaotic, making it important for EMS providers to understand and recognize the signs and symptoms of a trauma patient, and the techniques needed to provide the appropriate care.

Join Jeff Meade, EMT-P, CIC/RF, in a facilitated discussion about various trauma scenarios. This class will review case studies in a group setting designed to promote learning. Each scenario is designed with questions for discussion that are posed to the students. Extremity Trauma and the Mechanism of Injury scenarios will be discussed.

*This course may be applied toward Preparatory, Patient Assessment, Trauma, or Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.*
