

The Westchester County
Department of Emergency Services

TRAINING ANNOUNCEMENT

Issued: March 21, 2018

Announcement # 18-76E

EMS Week Series Pharmacology for BLS

Pharmacology...the study of drug actions. Why so many names for a drug? Is sublingual all that different from oral? Herbal supplements can't hurt, can they? And did you ever wonder what those crazy paramedics were giving to your patient? It always sounds so complicated....

Please join Brett Roberts, EMT/CIC, as he discusses the medications that we give our patients to make them feel better. At the end of this session you will hopefully have a better understanding of what drugs do in the body, why we administer them, which drugs BLS providers are authorized to administer, and be comfortable with the language of pharmacology.

This course may be applied toward Pharmacology or General Elective CME hours under the NY State DOH EMS Continuing Education Recertification Program.

Date(s) / Time(s): Friday, May 25th 10-12pm

Targeted Audience: BLS Providers
